Five Day International Online Workshop

on

Climate Smart Agriculture :Opportunities & Challenges

23rd-27th October 2020

Organised by

National Institute of Technology Karnataka, Surathkal

Jointly With

Hiroshima University, Japan

&

Tata Institute of Social Science ,Hyderabad

Sponsored by

ICSSR (India) – JSPS (Japan) Project

Resource Persons

Dr. Hugo De Groote
Principal Scientist,
CIMMYT , Nairobi

Dr. Kai Sonder
Geographic Information System Unit Head,
CIMMYT , Mexico

Prof. Pratap Singh Birthal
ICAR National Professor, ICAR- National Institute of Agricultural Economics and Policy Research, New Delhi

Dr. M. Maheshwari
Head, Division of Crop Sciences,
ICAR-Central Research Institute for Dryland Agriculture , Hyderabad

Dr. S. Sreekesh
Associate Professor,
Centre for Study of Regional Development
JNU, New Delhi

Prof. Akinobu KAWAI
Special professor
The Open University of Air, Japan

Prof. Sunil Nautiyal
Head, Center for Ecological Economics and Natural Resources, ISEC, Bengaluru, India

Mr. Nagata, Akira
Visiting Research Fellow
United Nations University Institute for the Advanced Study of Sustainability, Japan

Prof. Keshav Lall Maharjan
Professor,
Hiroshima University, Japan

Dr. Pradyot Ranjan Jena
Associate Professor
National Institute of Technology Karnataka

Dr Bibhu Prasad Nayak
Associate Professor,
Tata Institute of Social Science, Hyderabad

Overview:

Climate Change poses a serious threat to Agricultural production and food security. Climate Smart Agriculture(CSA) offers an integrative approach to address the interrelated challenges of food security, development and climate change. In 2010, FAO introduced the idea of climate-smart agriculture at the Hague Conference on Agriculture , Food Security and Climate Change, also abbreviated to CSA.

CSA has three main objectives:

1. Sustainably increasing agricultural productivity and incomes.
2. Adapting and building resilience to climate change.
3. Reducing and/or removing greenhouse gases emissions, where possible

CSA addresses the challenges of climate change in an integrated way through coordination between different stakeholders and sectors. It optimizes the use of natural resources and ecosystem services.

Workshop Objectives :

This workshop is designed to provide required knowledge on Climate Smart Agriculture .

The primary objective of the workshop are

1. To understand the implementation of sustainable agricultural practices for long-term food security.
2. To get a complete overview on cross-country synthesis of gaps and challenges of Climate Smart Agriculture : Lessons from India and Japan.
3. To raise awareness and build capacity to undertake CSA approaches as well as to determine collective priority interventions at national and regional levels .

Instructions

- ✓ Registered Participant will get the online platform link and access code in their registered mail .
- ✓ No Registration Fee
- ✓ Seat :100 (First come first will be given opportunity as the number of participant are limited to 100)
- ✓ E-Certificate will be issued to the Registered Participants who will attend the sessions.
- ✓ Time : 9.30 A.M. to 12 P.M (Everyday)
